ABOUT ANNSHIR TECH

Annshir Tech specializes in providing software test engineering services. The CEO has 12+ years of experience developing and testing to create processes programmatically and automating those processes. We are experienced in .Net Framework testing/development environment Agile/Waterfall under SCRUM Methodology. Testing over a range of industries, we provide testing services for complex systems, including point-of-sale (POS) software, fuel pump simulators and aviation and aerospace applications. Our expertise extends to the testing of simulators for mission-critical environments, fleet management software and trucking logistic platforms ensuring seamless functionality and high performance under real-world conditions. We also bring extensive knowledge in testing healthcare software adhering to industry standards for security, compliance and patient data protection.

TECHNICAL COMPETENCIES

Our team specializes in delivering high-quality software testing solutions tailored to agile environments. With deep expertise in automated and manual testing, our competencies include end-to-end functional testing, regression testing, and performance testing to optimize software performance and scalability. By employing behavior-driven development (BDD) practices and focusing on test-driven development (TDD), we deliver comprehensive test coverage.

DEV: JAVA, C#, ASP.NET, SQL

Software: Selenium, Zephyr, JIRA, Github, Netbeans, Eclipse, Visual Studio, SOAP UI, Team Foundation Server (TFS), IntelliJ

Database: SQL Server Management System (SSMS)

Testing: Stress, Performance, End to End, UAT, Backend, Smoke, Manual, Regression

Environment: Agile & Waterfall Methodology, Software Test Life Cycle, Software Development Life Cycle

PAST EXPERIENCE

Comdata (Fleetcor) Brentwood, TN
Dollar General Goodlettsville, TN
MAPCO Brentwood, TN
L3 Nashville, TN
Broadcast Music Inc. (BMI) Nashville, TN
CIGNA Nashville, TN

UEI: CC8ZXF4YFRR6
